Summary

I'm a front-end enthusiast with a knack for turning lines of code into seamless and visually appealing web experiences.

Believer in the power of collaboration, I thrive in environments where diverse talents come together to bring ideas to life. Let's create something amazing!

In this ever-evolving tech landscape, I'm dedicated to staying curious and embracing new challenges. Open to connecting with fellow developers, designers, and anyone passionate about the digital realm.

Experience

Personal Project

Weather Website

Oct 2023 - Oct 2023 (1 month)

Designed and developed a user-friendly weather forecast website leveraging the OpenWeather API to provide accurate and real-time weather information. The project involved creating an intuitive front-end interface allowing users to easily access current weather conditions, hourly forecasts and extended weather outlooks for their desired locations.

Technologies Used:

• HTML, CSS, JavaScript for front-end development.

• OpenWeather API for weather data retrieval.

• Responsive design principles for optimal user experience on diverse devices.

Outcome:

The Weather Forecast Website successfully provided users with a streamlined and informative platform to access weather updates, fostering a positive user experience. The project showcased my ability to integrate third-party APIs, collaborate within a team, and deliver a functional and aesthetically pleasing web application.

Personal Project

Vidtube

Oct 2022 - Nov 2022 (2 months)

Conceptualized and developed VidTube, a video streaming platform that provides users with a captivating and user-friendly experience. Focused on creating an aesthetically pleasing frontend design, the project aimed to deliver an engaging environment for users to discover and watch videos seamlessly.

Technologies Used:

• HTML, CSS, JavaScript for frontend development.

• Responsive design principles for cross-device compatibility.

Outcome:

VidTube successfully combines aesthetic design with a robust video playback page, providing users with a visually appealing and functionally rich platform for discovering and sharing videos. The project underscores my proficiency in frontend development, user interface design.

Education

Egerton University

Bachelor's Degree, Economics and Statistics

2018 - 2023

Power Learn Project

Computer Programming

2022 - 2022

- HTML, CSS & JavaScript
- Python
- Dart with Flutter
- Database Management

Menengai High School

High School Diploma

2014 - 2017

Skills

React.js • Test Driven Development • Asynchrony and APIs • Object-Oriented JavaScript • Responsive Web Design • Testing • Debugging • Arrays and Looping • Git • Linux and Windows
